LTP now in Vietnam

LTP now competitive on Asian production in big serials

On September 1st LTP is opening its own subsidiary in HCMC in Vietnam. Hereby we eliminated "the missing link" in our global production set-up of fashion and high functional garments. We can now offer a flexible and competitive set-up:

Lithuania: smaller orders
Belarus: medium orders
Vietnam: larger orders

The new department in Vietnam is build up with a number of local very highly skilled employees with long experience from the garment business.

The production will take place in our own factory which is under projecting and in a partnership with Danish owned and managed factory in HCMC, where we dispose over our own production unit. This factory is on a very high technical level, Gore-tex certified and used to complicated products.

Unique production set-up with only one sales and sampling department and one QC system where ever the production takes place.

At LTP, our finest task is to make it easy for our customers to work with us. With this outstanding production set-up, your production and purchase function cannot get simpler. It will always be the same employees who have the customer contact, developing the styles and the technical responsibility of the production.

Whichever production location suits the single order best, the whole supply chain is build up on our big know-how and experience within sourcing, production and quality control at the main office in Kaunas, Lithuania.

With this set-up, we can offer production in Vietnam at the same high "first time correctness" in sampling, the same simple

communication, the same technical understanding and the same sample corresponding production as you are used to from LTP.

For further info pls. contact our sales department at garment@l-t-p.com

Best regards,
Jon Knudsen
Owner and CEO, LTP group.
